|--------------|--|---|---|---|--|---|---|--|
| Сгор         | Crop Stage                                 | Location<br>(with GPS)  | Name<br>(Scientific<br>Name)  | Status<br>(Low,<br>Medium<br>&<br>Severe) | Name<br>(Scientific<br>Name)   | Status<br>(Low,<br>Medium<br>&<br>Severe) | (Nematodes,<br>Rat, etc.)<br>(Scientific<br>Name)               | Pest Advisories  |
| Black pepper | Nursery/<br>Vegetative/<br>Spike formation | Idukki,<br>Kozhikode,<br>Wayanad<br>(Kerala),<br>Kodagu<br>(Karnataka),<br>Tamil Nadu | Mealybug (Planococcus sp., Ferrisia virgata) (Nursery) Scale insect (Protopulvinari a longivalvata) (Nursery) | Low                                       | Stunt disease (Cucumber mosaic virus, Piper yellow mottle virus) Slow decline (Meloidogyne incognita., Radopholus similis) Foliar infection/Foot rot (Phytophthora spp.) Anthracnose (Colletotrichum gloeosporioides) Anthracnose (Colletotrichum gloeosporioides) | Low Low Low                               | Nematodes (Radopholus similis, Meloidogyne incognita) (Nursery) | Field: Stunt disease Regular monitoring. Remove infected vines and destroy by burning or burying deep in soil. Control the vector (mealy bugs) by drenching neem oil (0.5%).  Slow decline Remove and destroy severely affected vines. Apply neem cake @ 500g/vine and biocontrol agents like Pochonia chlamydosporia or Trichoderma harzianum @ 50 g/vine and metalaxyl-mancozeb (0.125%) may also be applied.  Foliar infection/Foot rot Follow strict phytosanitation. After the receipt of few monsoon showers, all the vines are to be drenched at a radius of 45-50 cm with copper oxychloride 0.2% @ 5-10 |
|              |  |   |   |   | (Nursery)  |   |   | litres/vine. A foliar spray with   |
